

# CHEMICAL INJECTION UTILITIES WATER TREATMENT SERVICES

ICR is a long-established and respected independent company specialising in the design, engineering and supply of chemical dosing systems and ancillary products and services. Innovative and flexible in its approach, ICR can be highly responsive and reactive to your requirements.

With over 30 years' experience in the demanding oil & gas industry we also work within the UK water and water treatment industry and bring all our expertise to your disposal.

The range of services we offer varies from a simple component through to the complete design, build and installation of bulk chemical dosing systems. Our nationwide coverage means ICR is also able to offer excellent support services.

## CHEMICAL DOSING SYSTEMS FOR WATER TREATMENT

As well as standard chemical dosing equipment, we have the capability to design and supply bespoke systems to meet your needs.

if you need advice please contact us first and one of our experts will discuss your options or even arrange a visit.

## CHEMICAL DOSING PUMPS

As well as packaged chemical dosing systems we supply a range of water treatment chemical dosing pumps and spares. We supply and support major dosing pump brands such as Williams, Milton Roy & Prominent

Among our most popular items are chlorine dosing pumps to dose sodium hypochlorite in water applications.

A full range of pump wet-end materials are available for corrosion resistance and chemical compatibility.

Some of our dosing pumps are readily available for immediate rental if required.

## CHEMICAL DOSING TANKS AND BUNDS

We supply an extensive range of dosing tanks, Standard sizes range from 50L to 1500L – larger tank sizes can be supplied as required. Dosing tanks can be supplied with matching outer bunds for additional security and environmental protection.
